Help your customers stay safe with the new Xerox Touchless App

Introducing the **Xerox Touchless Access App**: a safe and easy way for your customers to print, copy and scan without touching the control panel or worrying whether it has been wiped down.

The Xerox Touchless Access App works with all AltaLink and VersaLink machines and is entirely cloud-based. It's available now from the Xerox App Gallery at no cost.
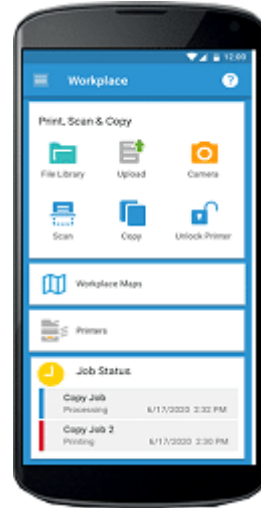

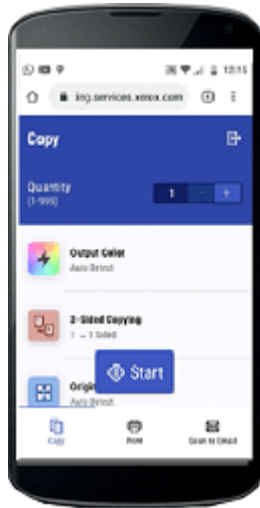

How it works

After customers install the app on the machine, the control panel will display a QR code. When a user scans this QR code with their phone's camera, access to the print, copy and scan functions will show on their smartphone. And that's all they need to do! They just scan the code, start the job using their smartphone, then collect the documents.

Two touchless options for your customers

The new Touchless Access App joins the Xerox Workplace Mobile app, also available at no cost, as a way of providing effortless, hygienic control of Xerox ConnectKey-enabled printers and MFPs. This is where they fit:

Xerox Touchless Access App	Xerox Workplace Mobile App
Great for occasional / guest workers	Great for highly repetitive tasks
No local network connection required	Connect over local network
App required on the machine but no app to install on the user's smartphone	App required on the user's smartphone, either self-installed or company-deployed
Better for open access environments	Better for environments that control user access

Delight your customers today

The Xerox Touchless Access App comes at a time when we are all trying to stay safe and when businesses are unusually cost-conscious. Tell your customers how it protects their staff at no cost, and use it to add even more value to the ConnectKey proposition.
